1. Introduction

Welcome to the Year 9 Assessment Booklet, a comprehensive guide crafted to assist both students and parents in navigating the assessments throughout the academic year. Our primary goal is to empower students to achieve their highest potential by providing clear insights and guidelines.

Within these pages, you will find detailed descriptions of assessments, encompassing various types and formats. The booklet acts as a roadmap, ensuring that students approach their academic responsibilities with clarity and confidence.

In addition to assessment details, the booklet addresses critical aspects such as the submission process, guidance for missed assessments, and key school contacts for specific issues. Recognising the significance of student accountability, we have outlined assessment responsibilities and provided practical advice for effective preparation.

To further aid planning, the booklet includes the scope and sequence, and assessment schedules for all courses, allowing students to align their studies with the curriculum structure. Additionally, there is information on who to contact if a student requires assistance, ensuring that support is readily available.

We have also included homework suggestions to foster a balanced approach to learning, emphasising the importance of holistic academic development.

We hope this comprehensive resource proves to be a valuable companion throughout the academic year, facilitating a proactive and successful approach to assessments. Wishing all Year 9 students a year filled with growth, achievement, and academic success.

2. The purpose of assessment

According to the NSW Education Standards Authority (NESA), “Assessment is the process of identifying, gathering and interpreting information about student achievement.”

Assessment is the broad name for the collection and evaluation of evidence of a student's learning. It is integral to teaching and learning and has multiple purposes. Assessment can enhance student engagement and motivation, particularly when it incorporates interaction with teachers, other students and a range of resources.

Assessment:

- provides opportunities for teachers to gather evidence about student achievement in relation to syllabus outcomes
- enables students to demonstrate what they know and can do
- clarifies student understanding of concepts and promotes deeper understanding
- provides evidence that current understanding and skills are a suitable basis for future learning.

Each assessment task should:

- be based on syllabus outcomes
- be a valid instrument for what they are designed to assess
- include criteria to clarify for students what aspects of learning are being assessed
- enable students to demonstrate their learning in a range of task types
- be reliable, measure what the task intends to assess, and provide accurate information on each student's achievement
- be free from bias and provide evidence that accurately represents a student's knowledge, understanding and skills
- enable students and teachers to use feedback effectively and reflect on the learning process
- be inclusive of and accessible for all students
- be part of an ongoing process where progress is monitored over time.

(NESA, NSW Education Standards Authority, n.d.)

Outcomes based assessment

All schools are required to deliver programs of study that comply with the requirements of the NSW Education Standards Authority (NESA) syllabuses (formerly BOSTES). More detailed information concerning each course and syllabus outcomes are available on the NESA website or use the following link: <http://educationstandards.nsw.edu.au/wps/portal/nesa/home/>

It is a requirement of the school assessment program that, for each course taught, schools establish a program of assessment tasks. These tasks are conducted throughout the year, and each task has a weighting which is used as a component of the reporting process.

School-based assessment tasks are linked to performance descriptors. The marking guidelines relate to specific course outcomes and the NESA performance standards.

Types of Assessment

Formal Assessment:

Formal assessment is a standardized, structured evaluation of student learning. It is based on pre-established criteria and is often used to compare student performance to that of other students or to a set standard.

Informal Assessment:

Informal assessment is an ongoing, flexible evaluation of student learning that is can be used to inform instruction and provide feedback to students. It is based on a variety of methods, such as observation, conversation, and work samples.

Formative Assessment:

Formative assessment is an ongoing evaluation conducted during the learning process to offer timely feedback to both students and educators. It guides subsequent learning activities and is an indispensable part of teaching and learning programs.

Summative Assessment:

Summative assessment occurs at the culmination of a unit or a defined period, providing an indication of a student's achievement level in accordance with curriculum standards or specific learning objectives.

Both formal and informal assessment can be formative or summative.

For example:	Formal	Informal
Formative	A portfolio of student work completed in class used to assess students' achievement in a topic.	Asking students to explain their thinking as they solve a problem.
Summative	A test given at the end of the year to assess students' achievement in a particular subject area.	A student portfolio that includes a variety of work samples from the year.

Assessment Approaches

Assessment and evaluation are vital aspects of the teaching and learning process. Approaches like assessment for learning, assessment as learning, and assessment of learning enable teachers to gather evidence and evaluate a student's growth in or achievement of educational outcomes. These methods, including formative assessment and summative assessment, can be employed individually or together, both formally and informally.

2.3.1 Assessment for learning

Assessment for learning," involves educators using evidence of students' knowledge, understanding, and skills to guide their teaching practices. This formative assessment approach is integrated into the entire teaching and learning journey, helping to clarify student comprehension.

Key characteristics of assessment for learning include:

- Embracing a perspective where assessment supports students in enhancing their learning rather than solely achieving higher grades.
- Incorporating a mix of formal and informal assessment activities integral to the learning process and future lesson planning.
- Establishing clear learning goals for each activity.
- Delivering constructive feedback that inspires learners and fosters improvement.
- Embodying the belief that every student can progress.
- Promoting self-assessment and peer assessment as routine aspects of classroom interactions.
- Engaging teachers, students, and parents in reflective discussions based on gathered evidence.
- Striving for inclusivity by catering to the diverse needs of all learners.

2.3.2 Assessment as learning

Assessment as learning takes place when students assume the role of self-assessors. Students actively oversee their own learning, pose inquiries, and employ various strategies to evaluate their knowledge and skills. They also determine how to leverage assessment information for subsequent learning.

Key aspects of assessment as learning include:

- Empowering students to take charge of their own learning journey.
- Mandating students to pose inquiries regarding their learning.
- Collaboratively establishing learning goals between teachers and students to foster growth and development.
- Offering avenues for students to utilize formal and informal feedback and engage in self-assessment to comprehend the next steps in their learning.
- Promoting peer assessment, self-assessment, and reflection as integral components of the learning process.

2.3.3 Assessment of Learning

Assessment of learning aids educators in utilising evidence of student progress to evaluate accomplishment against set outcomes and standards. Referred to as 'summative assessment,' it

typically occurs at specified key junctures within a teaching period or at the culmination of a unit, term, or semester.

Key aspects of assessment of learning include:

- Guiding the planning of future learning goals and pathways for students.
- Offering evidence of achievement to the broader community, encompassing parents, educators, students themselves, and external groups.
- Providing a clear and comprehensible interpretation across all audiences.

Maitland Grossmann High School incorporates all forms of assessment. A maximum of 2 formal assessments are set for each Semester.

Informal assessments will be varied and include both summative and formative assessment. The information gained from these assessments will ensure that every student is provided with many varying opportunities to demonstrate their growth in and achievement of their academic outcomes.

3. Assessment tasks

Assessment Tasks are **mandatory** for each course. Students are expected to apply themselves with diligence in order to satisfactorily meet course requirements.

A variety of assessment task styles- for example speaking, listening, reading, and writing are included in assessment programs to provide students with varied opportunities to demonstrate achievement of outcomes.

Students who indicate they are sick on the day of an assessment task should contact the subject Head Teacher to discuss whether the student should sit the task and to discuss the required documentation for non-completion.

Procedural fairness

All faculties support student learning by adopting a consistent approach to assessment by ensuring that:

- **All** students receive **two** weeks' notice of any formal assessment tasks.
- A parent/caregiver is **notified** within **14 days** if a formal assessment task has not been submitted.

Assessment schedules, and scope & sequence information

Within each subject the assessment schedule, and scope and sequence will provide the following:

- Syllabus outcomes relevant to each topic
- Content being studied
- Timing of the individual formal assessment task (weeks / terms only)
- Weightings of each task

Number of formal assessments

Maximum of 2 formal assessment tasks per year for yearly courses. Maximum of 1 formal assessment task for semesterised subjects.

Informal Formative Assessment

In line with a faculty determined process:

Teachers may use *informal formative assessment* practices to allow students to demonstrate knowledge and understanding of subject skill and content as part of classwork. Teachers can combine a range of assessment methods and strategies to assess student learning and ensure multiple opportunities for students to demonstrate the achievement of outcomes.

Example strategies may include (but are not limited to):

- Analysis of students work.
- Strategic questioning strategies.
- Admit/exit tickets.
- One-minute papers.
- Monitored classroom discussions.
- Learning logs.
- 30-Second Share.
- Low-stakes quizzes.

Such assessment may be used in reports:

- To report on outcomes not covered in formal assessment.
- To moderate, augment or supplement the reporting of outcomes from formal assessment.

Submission of tasks

Students are required to complete and submit mandatory assessment tasks on or before the due date.

Furthermore, students must:

- Make a serious attempt at all assessment tasks.
- Avoid any behaviour which disrupts other students during the completion of a task.
- Approach any task with honesty and avoid any malpractice including cheating or plagiarism.
- Submit work directly to the relevant teacher.
- Inform their teacher in advance if they know they will be absent for a task.
- Ask their teachers about any assessment tasks which may have been issued during any absence.

Late submission

Assessment Tasks submitted late, without prior arrangement, **may incur a loss of marks**. Penalties for late submission of tasks will be determined by the Head Teacher of the Key Learning Area.

Extensions

If an extension of time is needed, the student must negotiate with the Classroom and Head Teacher of the course at least one week prior to the due date.

Malpractice

Malpractice is any activity undertaken by a student that allows them to gain an unfair advantage over others. It includes, but is not limited to:

- Copying someone else's work in part or in whole, and presenting it as their own.
- Using material directly from books, journals, or the internet without reference to the source.
- Building on the ideas of another person without reference to the source.
- Buying, stealing or borrowing another person's work and presenting it as their own
- Submitting work to which another person such as a parent, coach or subject expert has contributed substantially using words, ideas, designs or the workmanship of others in practical and performance tasks without appropriate acknowledgement.
- Paying someone to write or prepare material.
- Breaching school examination rules.
- Using non-approved aides during an assessment task.
- Contriving false explanations to explain work not handed in by the due date.
- Assisting another student to engage in malpractice.

Where cheating is detected a mark of zero will be given for the task to each student involved.

Student preparation of assessment tasks

Our aim at MGHS is for all students to become responsible for their own learning. Parents / Carers are encouraged to assist in their students learning and establishing a regular home study / revision routine.

The following Homework ideas can help students to be prepared for their classes and assessment tasks.

Assessment Preparation:

- The research and planning aspects of assessments should be carried out first.
- Then the actual completion of the task should take place (ticking off all relevant aspects as complete).
- Finally read over and edit work to ensure the work has been finessed.
- Write regular revision notes and revise them for upcoming tests and in-class tasks.

Class work:

- Complete any unfinished class work and/or complete any set homework tasks prior to their due date.
- Ensure homework is ready to present for the next lesson
- Brain dump – give yourself 3 minutes to write down everything you learned in class that day
- Create a concept map to build relationships between key words, phrases, class content

Wide reading:

- Read both fiction and non-fiction sources covering the topics being studied in class
- There are lots of ideas on this website for ways to enhance your reading skills
<https://www.educatorstechnology.co.uk/2018/02/19-educational-websites-to-enhance.html>

- Use online resources or databases to find relevant articles and e-books on topics being studied. - <https://www.sl.nsw.gov.au/>

Teach:

- Teach your family something you were taught during class this week.

Language and Writing strategies:

- Compile a topic glossary at the back of the book (look up any new terms/concepts that the student is unfamiliar with and try to integrate these into future lessons).
- Play Words with Friends (or similar) complete a crossword or play a game of scrabble

Media/ICT:

- Watch relevant films and documentaries
- Watch the news and current affairs programs
- Create a Kahoot on your topic towards the end of the unit to use as revision.
- Read hard copy or online newspapers and post interesting articles on Google Classroom to discuss in class.

4. Student responsibilities

- Students are expected to complete ALL assessment tasks by the due dates and times specified.
- Where assessment tasks involve attendance at excursions, field studies etc, attendance is compulsory.
- All work submitted for assessment must be your own work. (See Malpractice above)
- It is each student's responsibility to be aware of assessment task dates for all courses and to organise a study schedule accordingly.
- Technology malfunction is not an acceptable excuse for non-submission of a task. If this occurs, students should submit the '**draft**' of the task (labelled as such) to their teacher on the due date. Keep copies of all drafting so that your progress can be shown in the case of a computer/printer/technology USB malfunction.

5. Parental notification

Years 7-9 – All formal assessment tasks not submitted will result in an **Academic Warning Letter** being sent.

6. Absence, illness & misadventure

When a student is absent on the day when a task is due or an in-class assessment performed, and **the absence is known beforehand**, the student must make arrangements for the task to be submitted or completed **on or before** time.

A note from the parent/caregiver is required to explain the student's absence from an assessment task. Wherever possible, **this is required on the student's first day back at school.**

Where special consideration is required, the teacher, in consultation with the Head Teacher, may make arrangements which may include, but are not limited to:

- (i) completing the original task
- (ii) completing an alternate task

Examples of illness/ misadventure include (but not limited to):

- Bereavement
- Illness
- Family Leave
- School Representation for sports or academic pursuits
- Personal Issues

7. Advice to students

- ✓ Be positive and optimistic.
- ✓ Ensure that you are familiar with the sections of this assessment booklet relevant to your pattern of study.
- ✓ As an active learner who exercises self-regulation, take responsibility for managing your assessment schedule and meeting deadlines.
- ✓ Keep a record of tasks completed for each subject so that, at any given time, you know exactly what proportion of your course assessment has been completed and how much remains.
- ✓ Seek feedback from teachers if you are unsure about what you need to do to improve and make further progress.
- ✓ Open communication helps to minimise misunderstanding and confusion. Communication regarding assessment tasks is managed by each faculty- the classroom teacher in the first instance, and then the Head Teacher of the subject concerned. If issues with your health and wellbeing are impacting upon your learning, contact your teachers and Year Advisers so that measures of guidance and support can be discussed.
- ✓ Inform your teacher if you know that you will be absent when a task is due and make alternative arrangements for the task to be submitted or completed **on or before** time.

8. Life Skills

All students are entitled to participate in and progress through the curriculum. Years 7–10 courses based on Life Skills outcomes and content and provide options for students with disability who cannot access the regular course outcomes, particularly students with an intellectual disability. In these instances, elements of this policy are not applicable.

Information regarding the Assessment and Reporting for Life Skills outcomes can be found at <https://educationstandards.nsw.edu.au/wps/portal/nesa/11-12/Diversity-in-learning/stage-6-special-education/life-skills/assessment-and-reporting>

9. MGHS Support Processes

Maitland Grossmann High School will utilise a range of support strategies to encourage student participation and engagement within the curriculum.

These include but not limited to:

MGHS Support Process

Classroom teachers address academic concern in a collaborative process. This may be achieved through:

- A documented meeting with student on Sentral
- An inclusive collaborative curriculum meeting with the family of the student.
- Mentoring

Adjustments must be reasonable and consider the needs of all students in the classroom, the time constraints of the lesson and the professional demands on the teacher.

Cumberland Centre Support Program

The Cumberland Centre is a support facility which may be utilised to assist students in the successful completion of their classwork and assignments. The Cumberland Centre may be used in circumstances where support is required across multiple faculties, or more intensive, individualised support.

Accessing Cumberland Centre Support:

- Classroom Teacher can refer students directly to the Cumberland Centre through Sentral.
- Students can also self-refer to the Cumberland Centre
- Students can attend Eat and Complete – Details provided in the school notices

Wellbeing Support

Students who have a diagnosis that affects their learning should contact the Head Teacher Wellbeing to organise any special considerations or adjustments that are needed to provide an equitable learning environment. An Individual Education Plan (IEP) will need to be completed to ensure a consistent approach to support throughout their schooling and assessments.

10. Reporting Procedures

Grades, assessment marks and outcome assessments will be determined from both summative and formative assessment results.

Informal formative assessment may be used in reports:

- To report on outcomes not covered in formal assessment.
- To moderate, augment or supplement the reporting of outcomes from formal assessment.

IND5-1	identifies, assesses, applies and manages the risks and WHS issues associated with the use of a range of tools, equipment, materials, processes and technologies
IND5-2	applies design principles in the modification, development and production of projects
IND5-3	identifies, selects and uses a range of hand and machine tools, equipment and processes to produce quality practical projects
IND5-4	selects, justifies and uses a range of relevant and associated materials for specific applications
IND5-5	selects, interprets and applies a range of suitable communication techniques in the development, planning, production and presentation of ideas and projects
IND5-6	identifies and participates in collaborative work practices in the learning environment
IND5-7	applies and transfers skills, processes and materials to a variety of contexts and projects
IND5-8	evaluates products in terms of functional, economic, aesthetic and environmental qualities and quality of construction
IND5-9	describes, analyses and uses a range of current, new and emerging technologies and their various applications
IND5-10	describes, analyses and evaluates the impact of technology on society, the environment and cultural issues locally and globally

2	Yearly Exam	MAR5-1, 5-3, 5-7,5-9, 5-13, 5-14	50%	Term 4 Week 4

Outcomes – A student:	
MAR5-1	identifies and describes a range of marine and aquatic ecosystems and investigates their complex interrelationships
MAR5-2:	identifies, describes and evaluates the social and economic importance of marine ecosystems
MAR5-3	identifies, describes and evaluates the effects humans have had on the marine environment
MAR5-4	explains why aquaculture provides an economically sustainable source of food
MAR5-5	assesses the potential of aquaculture to sustain wild fish stocks and the aquatic environment
MAR5-6	evaluates the economic and environmental sustainability of aquacultural pursuits
MAR5-7	identifies, describes and evaluates the ethical, social and sustainability issues related to the marine environment
MAR5-8	identifies, describes and evaluates policies for monitoring and conserving the marine environment
MAR5-9	selects and uses a broad range of contemporary materials, equipment and techniques with confidence in aquaculture and marine settings
MAR5-10	demonstrates safe and responsible use of a range of materials, equipment and techniques in different aquaculture, marine and maritime situations
MAR5-11	identifies and describes a range of aquaculture, marine and maritime vocations and leisure pursuits
MAR5-12	identifies and describes the role of volunteer organisations that assist in the protection and management of the marine environment
MAR5-13	collects and organises data by experimenting and accurately reading instruments, signals and charts and communicates this information
MAR5-14	recalls aspects of the marine environment using relevant conventions, terminology and symbols

Outcomes – A student:

PD5-1	Assesses their own and others' capacity to reflect on and respond positively to challenges
PD5-2	Researches and appraises the effectiveness of health information and support services available in the community
PD5-3	Analyses factors and strategies that enhance inclusivity, equality and respectful relationships
PD5-4	Adapts and improvises movement skills to perform creative movement across a range of dynamic physical activity contexts
PD5-5	Appraises and justifies choices of actions when solving complex movement challenges
PD5-6	Critiques contextual factors, attitudes and behaviours to effectively promote health, safety, wellbeing and participation in physical activity
PD5-7	Plans, implements and critiques strategies to promote health, safety, wellbeing and participation in physical activity in their communities
PD5-8	Designs, implements and evaluates personalised plans to enhance health and participation in a lifetime of physical activity
PD5-9	Assesses and applies self-management skills to effectively manage complex situations
PD5-10	Critiques their ability to enact interpersonal skills to build and maintain respectful and inclusive relationships in a variety of groups or contexts
PD5-11	Refines and applies movement skills and concepts to compose and perform innovative movement sequences
